

Project Report

1. INTRODUCTION

1.1 Overview

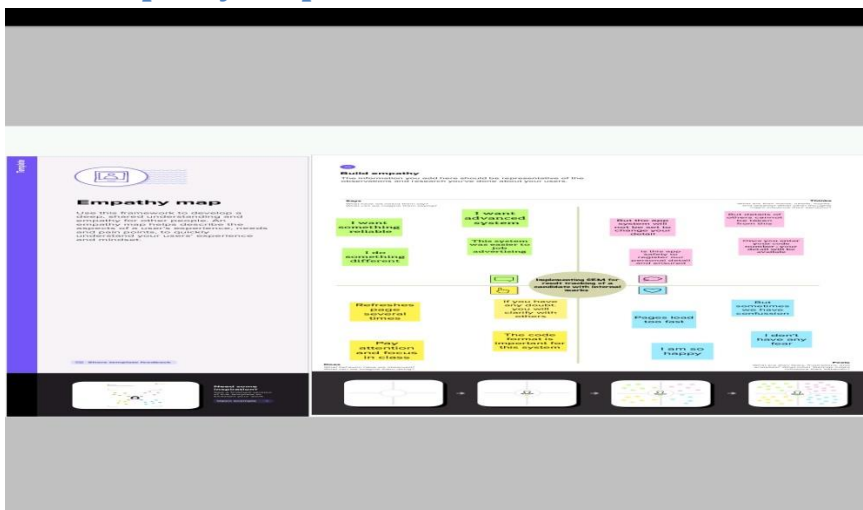

Administrator should be able to create all base data including semester, candidate, course and lecturer, lecturer should have the ability to create internal results, dean, who is one of the lecturer, should be the only one with ability to update internal results, reevaluation can be initialized by candidate for all internal results. Now only dean can update the marks after evaluation.

1.2 Purpose

- By internal marks it means that your marks obtained by your assignment or other co- curricular activities or your behavior most important.
- It is the marks that is given by your teacher to you.
- The marks you obtained in your exams or theory is external marks

2. PROBLEM DEFINITION & DESIGN THINKING

2.1 Empathy map

2.2 Ideation & Brainstorming map

1 Define your problem statement
What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.
5 minutes

2 Brainstorm
Write down any ideas that come to mind that address your problem statement.
10 minutes

How to create custody internal scores?

Key rules of brainstorming
To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Team leader
Our internal mark project has highly reliable biometric system.

Member 1
There is no need to worry any kind of data to engage your information in our project.

Member 2
All of your hardware and sensor marks will be entered.

Member 3
The motivating columns are included in our project.

Member 4
Our project have the facilities of downloading the documents.

Member 5
After that, your creating ideas in our app. If you are into mobile hardware.

Member 6
Our internal mark project has a high reliable biometric system.

Member 7
But details of others cannot be taken from this.

Member 8
We will enjoy the working process.

Member 9
This is not a busy schedule.

Member 10
This app content is easy.

Member 11
In our project paper validation is included.

Member 12
In this app safety to register our personal detail and entered.

Member 13
This app is important to the students.

Member 14
Refreshed the page to make it load.

Member 15
Strong option and unified to make value judgment.

Member 16
documents will be displayed clearly.

Member 17
We will make them very satisfied.

Tip
You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

Galaxy M21
Select to choose what happens with this device.

What the students wants in internal marks?

1. Students want paper valuation.

2. If this app safety to register.

3. Our internal mark project has highly reliable biometric system.

4. The students want advanced system.

5. Students want paper valuation.

6. Values report.

7. Advanced system.

8. Safety register.

9. Biometric system.

10. Pay attention.

Tip
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Tip
If each of these tools could get done without any difficulty or even, which would have the most positive impact?

Tip
Participants can use their cursor to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer (holding the M key on the keyboard).

Importance
If each of these tools could get done without any difficulty or even, which would have the most positive impact?

3 . RESULT

3.1 Data model

3.2 Activity & Screenshot

<i>Object Name</i>	<i>Fields in the object</i>	
Semester	Field label	Data type
	Semester	Look up
Candidate	Field label	Data type
	Candidate	Look up
Course Details	Field label	Data type
	Course detail	Master detail
Lecture Details	Field label	Data type
	Lecture detail	Look up
Internal results	Field label	Data type
	Internal results	Look up

3.2 Activity & screen shot

- First we need to create a new custom object.

The screenshot displays the Salesforce 'New Custom Object' setup interface. The browser window shows the URL: `kunthavainaacchiargovarts-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/new`. The page title is 'New Custom Object'. Below the title, there is a section for 'Custom Object Information' with the following fields:

- Label:** A text input field with a placeholder 'Label'. Example: Account.
- Plural Label:** A text input field with a placeholder 'Plural Label'. Example: Accounts.
- Starts with vowel sound:** A checkbox.
- Object Name:** A text input field with a placeholder 'Object Name'. Example: Account.
- Description:** A large text area for the object's description.

At the bottom of the page, there is a footer with the text: 'Context-Sensitive Help Setting' and 'Open the standard Salesforce.com Help & Training window'.

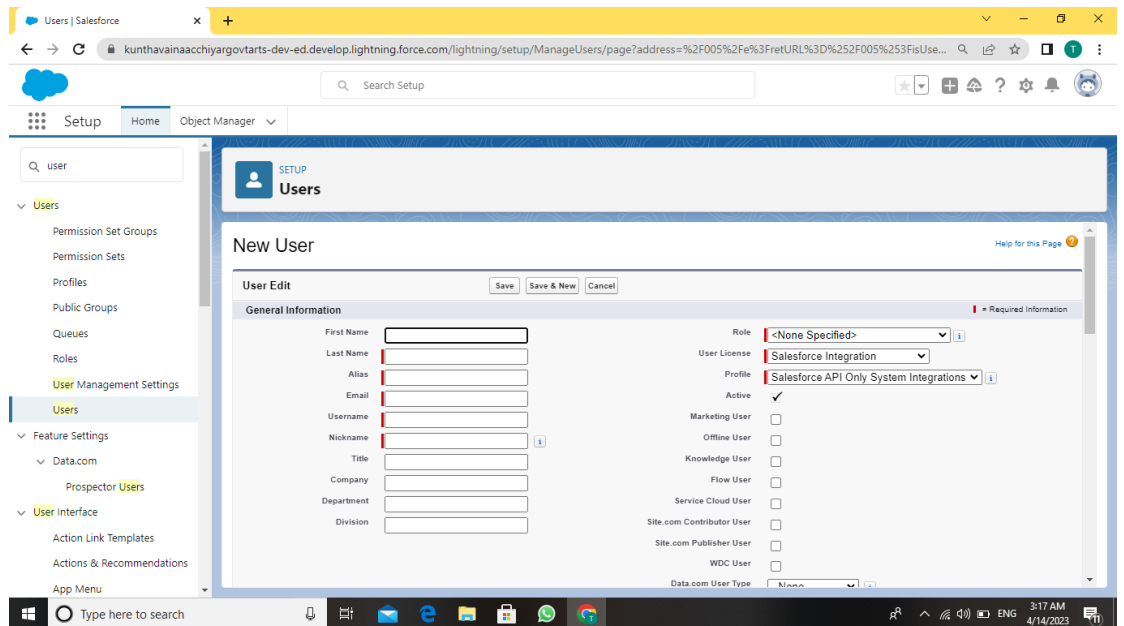

- An object relationship in salesforce is two- way association between two object .Relationship are created by creating custom relationship fields on an object.

The screenshot shows the Salesforce Setup interface, specifically the 'Object Manager' section for 'Course Detail'. The left sidebar lists various setup options, with 'Fields & Relationships' selected. The main content area displays 'Step 3 of 6: Enter the label and name for the lookup field'. The form includes fields for 'Field Label', 'Field Name', 'Description', and 'Help Text'. Below these, the 'Child Relationship Name' is set to 'Course_Detail'. The 'Required' section has two options: 'Always require a value in this field in order to save a record' (unchecked) and 'Clear the value of this field. You can't choose this option if you make this field required.' (checked). The 'Auto add to custom report type' section has two options: 'Don't allow deletion of the lookup record that's part of a lookup relationship.' (unchecked) and 'Add this field to existing custom report types that contain this entity.' (checked). Navigation buttons 'Previous', 'Next', and 'Cancel' are visible at the top and bottom right of the form.

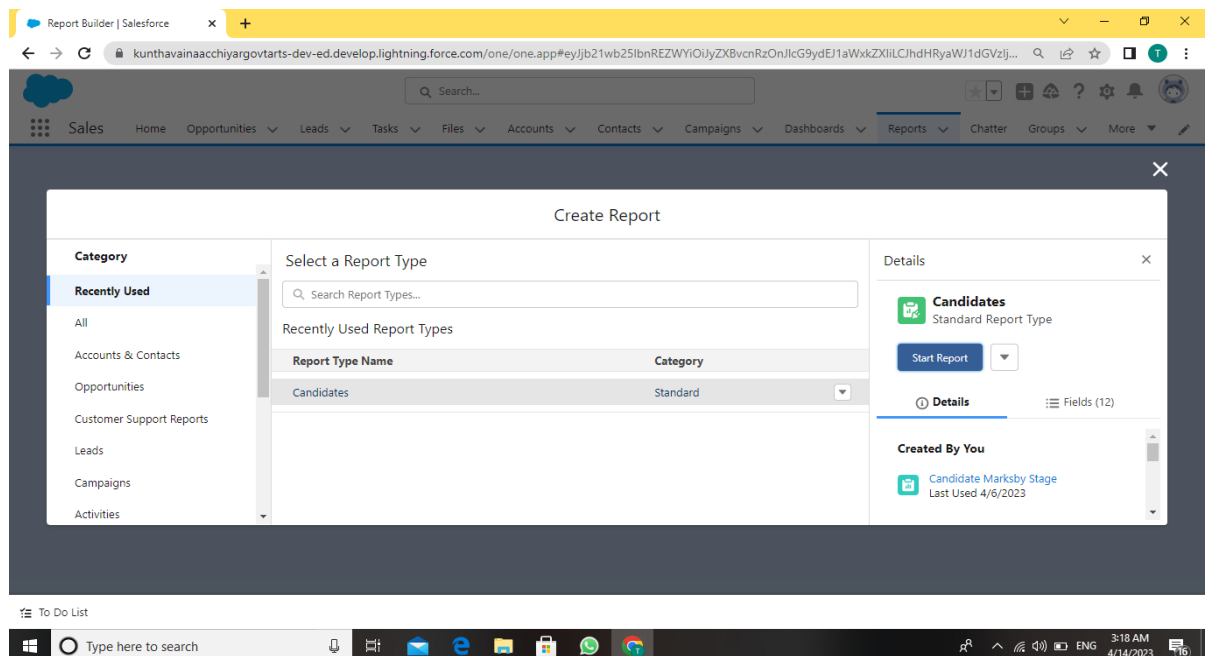

- Apps in Salesforce are a group of tabs that help the application Function by working together as a unit.

The screenshot shows the Salesforce App Manager interface, specifically the 'New Lightning App' dialog box. The dialog is titled 'App Details & Branding' and contains two main sections: 'App Details' and 'App Branding'. The 'App Details' section includes fields for 'App Name', 'Developer Name', and 'Description'. The 'App Branding' section includes an 'Image' upload button, a 'Primary Color Hex' field with a value of '#007002', and an 'Org Theme Options' slider. A 'Next' button is located at the bottom right of the dialog. The background shows the Salesforce Setup interface with a list of apps.

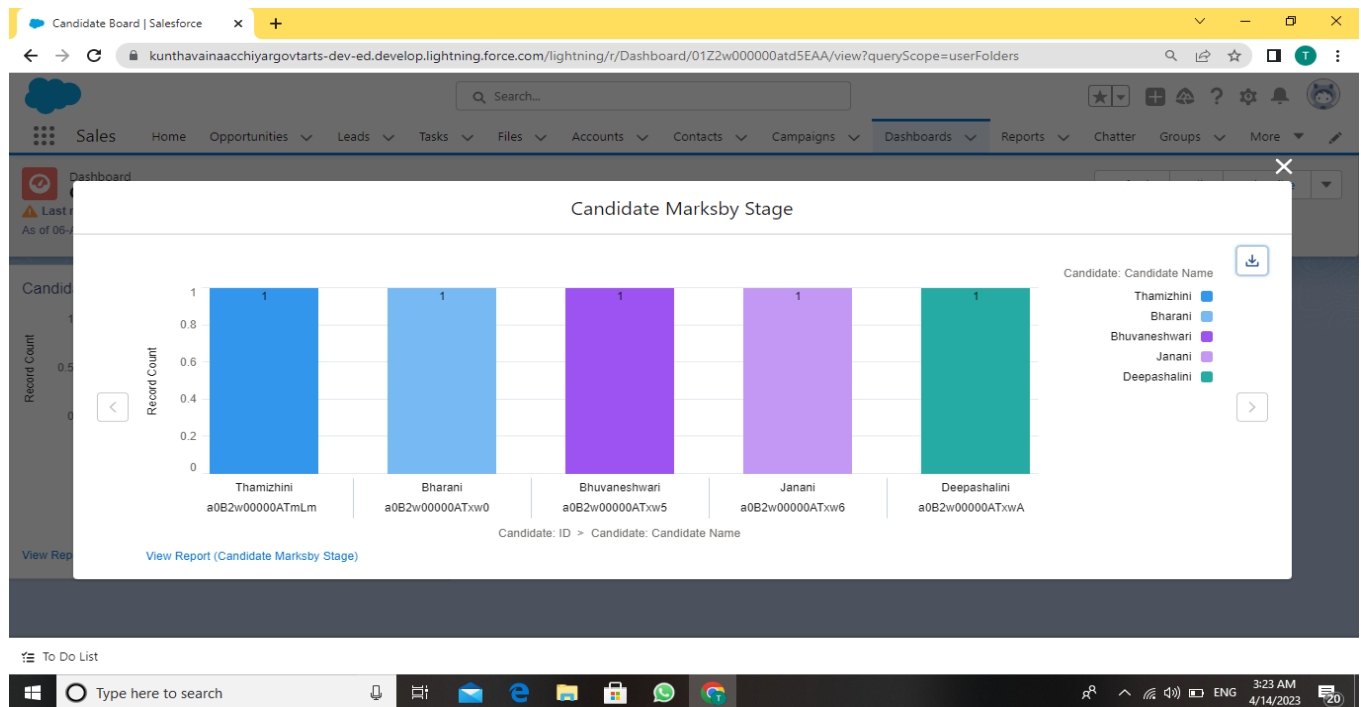

- A user is anyone who logs in to salesforce.

- A report is a list of records that meet the criteria you define.

- Dashboard let you curate data from reports using charts, tables, and metrics. If your colleagues need more information.

4. TRAILHEAD PROFILE PUBLIC URL

Team lead - <https://trailblazer.me/id/t2020batch>

Team member 1- <https://trailblazer.me/id/b2020batch1>

Team member 2- <https://trailblazer.me/id/b2020batch2>

Team member 4 – <https://trailblazer.me/id/d2020batch1>

5. ADVANTAGES

- Is this app safety to register our personal detail and ensured.
- But the app system will not be set to change your details.

- But detail of others cannot be taken from this.

DISADVANTAGES

- Security concerns associated with centralized data.
- But the app system will not be set to change your detail
- Page load too slow
- But sometime we have confusion

6. APPLICATION

- Implementing CRM in result tracking can be used in all educational institutions to track candidate results.
- It can be used both in schools and colleges.
- In schools, college even in universities, it would be very useful in monitoring students. performance and records.
- Educational institutions deals with lots of test paper and student evaluation.

7. CONCLUSION

- Educational institution deals with lots of test paper and student evaluation.
- It is a painstaking process for teachers to evaluate and keep track of student test and assessment.

- So we have come up with a solution known as implementing CRM in result tracking with internal marks.
- By this app we can show the students result in graphical representation which is easier to manage their results.

8. FUTURE SCOPE

- Deeply integrates with social media, websites, cloud telephony and other software to bring all queries to a unified dashboard.
- AI- Powered bots, automated feedback or information collection and canned responses save time for your staff.
